TENTATIVE OUTAGE SCHEDULE

With the most recent loss of TEMES Combustion Turbine 7, the Island Wide Power System (IWPS) is subjected to an additional reduction of approximately 20 megawatts of generation capacity to meet demand for electricity during the late afternoon to evening peak. This tentative outage schedule is issued for planning purposes in the event there is a need due to lack of reserves. As such the Guam Power Authority announces the following tentative outage schedule as needed and is subject to change depending on actual demand for power:
